

# Life is a privilege not a right!

**" I step fearlessly into the greatest possibility I have the courage to imagine,  
in full faith that it has already been prepared for me to experience."**

David Pickard Wyllie

Life is a privilege not a right, if we have the privilege of still being on this planet, it is because our soul has not completed its business in this dimension of energy. It takes a commitment to becoming a vibrational match to the desires that our soul is imprinting in our imagination; I repeat our soul not the media.

Each of us are playing a role in the evolution of the entire Universe, in the same way as the cells in our body are playing their part in every aspect of our lives. The process of creation is truly miraculous, we do not have the capacity to grasp its magnitude, but we all have access to it, this default program is part of the responsibility of being human. Our collective uniqueness's implemented are the Universe's way of experiencing the infinite possibilities of the matrix of creation.

Are you a conscious creator or have you chosen to ignore the uniqueness of your DNA? If we are all individual expressions of our creator and we are all uniquely distinct expressions, then in order for the experience to be realised successfully we must accept the responsibility to live an authentic life and maintain our unique individual expression.

Which means that we cannot look to any institution or outside authority for what is right for us, we must learn to trust our Divine connection and rely on our insights; this requires that we override the limits of our logic and have faith in the power of our intuitive genius to instruct the logical mind.

The dolphins do not need an intricate educational system to learn to communicate with one another. The turtles do not need a map; they feel their way to their innate intelligence, and this is what we are being called to claim back i.e. our innate knowing. We must be willing to trust what comes from the soul and transcend the fear of our logic.

On our journey through life, we have our own guidance system it communicates to us through instinct, feelings, desires, but too often we are too busy doing life according to society's standards that we ignore or abandon its direction. This inner guide is waiting patiently for your acknowledgement, you must choose to listen so that it can fulfil its purpose and help you achieve your higher purpose in other words your soul purpose.

My passion which led to my greatest contribution to humanity over the past fifty years has been and still is assisting individuals discover their true nature and work their latent potential. I am a dyslexic school dropout, who at the age of 26 heard myself tell a room full of people that one day I would be one of the world's greatest teachers; I had no idea where that thought came from. While everyone laughed, I collapsed in a heap in tears, but I listened and followed my intuition and a few years later TAG Training International was born.

I have no certificates hanging on my walls, I only share what my life experience has proven to be effective and the thousands of individuals who have had the courage to apply the principles imparted have lived rich and fulfilling lives.

I wish you the courage to live the life you were meant to. for more information about my work visit:
